

HOW NORMAL BODY TEMPERATURE INFLUENCE ON THE LIKELINESS OF PINEAPPLE

Muhammad Imran Qadir, Asma Rasheed*

Institute of Molecular Biology and Biotechnology, Bahauddin Zakariya University, Multan, Pakistan

ABSTRACT

The purpose of the immediate study was to associate relations of normal body temperature with likeness of pineapple. One hundred and forty students take parts in this study. A questionnaire was provided them, and asked about their likes pineapple and normal body temperature. Present research shows that students like to eat pineapple have normal body temperature other then do not like to eat pineapple. Census was intended about normal body temperature and pineapple likeliness. Complete Statistical investigation was done by using micro soft excel. The current inquiry shows that the student's normal body temperature to eat pineapple. Have more body temperature then the other does not like to eat pineapple.

Keywords. Normal body temperature, pineapple.

No: of Tables : 01

No: of References: 10

INTRODUCTION

Human normal body temperature 98.6F° or 37C°. abnormal person body temperature below 37-38. Many factors stimulus our body temperature including activity age sex day of time, kids normal body temperature 99F° 37C°. body temperature of woman's influenced by hormones or woman menstrual cycle. Human body temperature below 100.4F 38C° are considered to be a fever. Indications of the fever hot skin increased heart rate dehydration of the body weight loss. Dangerous body temperature 39-42 is high fever below 42.4C° very high fever cause serious long lasting destruction typical source of fever blood clamp skin infectious disease. Body temperature control central nervous system. Upper parts of brain central nervous system.

Pineapple is essential grow strong bones connective tissue, pineapple cover bromelain enzyme. Drinking pineapple Pineapple high quantity of vitamin C. pineapple is tropical fruit ironic source of vitamins and minerals. Low calories in pineapple juice having decreased the body temperature. Fresh pineapple can be start summer season unfilled stomach best time to eating pineapple.

Objective of the immediate research was to associate with contact of normal body temperature with pineapple likeness.

MATERIALS AND METHOD

One hundred and forty students joined in this study. Inquiry were providing them, in which they asked about their likeness of pineapple and normal body temperature. All the students was measured normal body temperature with the help of thermometer.

Project

Census was intended about normal body temperature and pineapple likeliness.

Statistical investigation

Complete Statistical investigation was done by using micro soft excel.

RESULT AND ANA ANALYSIS

Relationship of normal body temperature with pineapple likeness given in Table number 1 student's normal body temperature 96.82 ± 1.79 like pineapple. And normal body temperatures 97.6 ± 1.42 do not like pineapple.

Table 1. Effect of normal body temperature (Mean±SD) with pineapple likeness.

Normal body temperature	Likeness of pineapple	Dislikeness of pineapple	<i>p-value</i>
	96.82 ± 1.79	97.6 ± 1.42	0.01*

CONCLUSION

The current inquiry shows that the student's normal body temperature to eat pineapple. Have more body temperature then the other does not like to eat pineapple.
